Management Information system

**IPA Cross-Border Programme
CCI Number 2007CB16IPO007**

In order to facilitate the overall implementation of the Programme, at both programme and project level, the Management Information System is created as practical tool for performing the task of the relevant authorities (Managing Authority, National Authority, Certifying Authority, JTS). MIS is useful tool for tracking of the relevant operations and monitoring the whole lifecycle of the project. As a first step all of the documents concerning the assessment of the applications have been uploaded – application forms, supporting documents, assessment grids, etc. During the implementation of the contracts certificates for validation of expenditures, invoice reports, requests for payments, appeals, irregularities and other relevant information will be uploaded.

What are twinnings really useful for?
 I like the idea of twinning municipalities. It promotes an idea of openness, contact, dialogue... But in practice, I am not quite sure that I understand the stakes involved. What can we do with twinnings that is not possible without them?
 I have been told that some common activities could be organized at school level: student exchanges, short trips, etc. I am well aware that educating our young citizens is fundamental, but still, it is important to help grown-ups get acquainted with the idea of European integration, cohesion and reconciliation.
 What do twinnings allow for these people? What are the current positive experiences of twinnings between a "EU municipalities" and "non-EU member" SEE municipalities? Did twinnings help Slovenia, Romania and Bulgaria integrate the European Union?
 I thank you for your answers, which I expect to be numerous.
