Project description

This project mainly oriented to reduce negative effects on the environment and to promote the sustainable utilization of eco resources by providing support for the development of the organic production and fostering the adoption of environmental friendly economic activities in the common cross-border region of Bulgaria and FYROM. In addition the organic production and agriculture is directly related to biodiversity and environmental protection. The project focused on development and the transition to organic production and agriculture by raising awareness and building capacities, knowledge and skills for organic production among target groups on the various ecological, economic and social benefits of developing and moving to organic production. Building capacities for extension of specific know –how on modern techniques and agricultural practices in setting up and implementing organic production among advisory, training and educational service providers.

The project was successfully implemented in December 2014.
