Project title

Public Institutions – Energy efficiency

Axis

Priority Axis 1: Economic Development and Social Cohesion

Area of intervention

1.3 Project preparation

Lead Partner

Municipal Primay school "Ilinden" Kriva Palanka, MK

Partner 2

Public support Centre, Dupnitsa, BG

Duration

12,5 months

Total budget

142 324,62 EUR

Project description

The primary goal of this project was development of technical documentation. Within the project sixteen (16) technical documentation have been prepared for sixteen (16) public institutions (nine (9) public institutions from Kriva Palanka, MK and seven (7) public institutions for Dupnitsa, BG). Prepared sixteen preliminary and detailed works plans are base for implementation of future infrastructure projects. The developed technical projects include improving the conditions of work and life, create pleasant ambience and optimization between architecture and power consumption through a number of realistic solutions using natural sources of energy. Improvement of the conditions will be achieved through construction activities for rehabilitation of buildings, renovation of roof construction and roof cover, flat passable roof reconstruction, and replacement of carpentry facade. Planned construction activities are specified in the project tasks that will assure project success. These tasks also include technical solutions and technology performance and highlighted all the factors that contribute to achieving the ultimate goal. The main goal of prior and timely prepared technical documentation is maximum energy savings, as well as the elimination of possible errors in the process of future realization of these technical projects.

The project was successfully implemented in May 2015.
