Project title

"TOWARDS THE FUTURE" - Study on the potential and utilization of renewable energy sources in the cross border region

Axis

Axis 1: Economic Development and Social Cohesion

Area of intervention

1.3 Project Preparation

Lead Partner

Centre for development of the South-East planning region

Partner 2

Association of South Western municipalities

Duration

18 months

Total budget

147.403,41 EUR

Project description

The project contributed to the increasing of the public awareness for the potential of the Renewable Energy Resources in the cross border region and future utilization of the eco resources. The project activities included: development of studies on increasing of the energy efficiency and the use of renewable energy resources, round tables and workshops to support the exchange of experience and transfer of know-how, as well as boost the cooperation for joint activities in the cross border region. The overall objective of the project was to improve the quality of life of the inhabitants of the region by increasing the energy efficiency in the region and utilization of the eco resources. The project specific objectives also included: (i) increasing the awareness for the renewable energy sources through the implementation of public awareness campaigns; (ii) introducing the employees with the possibilities for renewable energy sources in the cross border region and the ways of their utilization; (iii) introducing the energy efficiency concept to the private and public entities located in the cross border region; (iv) determination of the capacities of the renewable energy sources in the region identified in the new product: "Study on the potential and utilization of renewable energy sources in the cross border region".

The project was successfully implemented in June 2015.
