Total budget

496 500,33 EUR

Project description

The overall objective of this project was contribution in utilization of the existing eco resources in a way that increases the quality of life in the two towns: Berovo and Goce Delchev, on the two sides of the border.

Specific objectives that the action was aiming to achieve were:

- increasing the energy efficiency of two kindergartens located in the two municipalities;
- utilizing eco resources for energy generation and produce economic benefits by reducing the costs;
- education of the children about the importance of the use of renewable energy and pollution prevention;
- building partnership between the two municipalities for joint initiatives toward green growth on the common territory.

The project's operational objectives were:

- thermal and hydro insulation of the kindergarten in Rusinovo village, Berovo municipality;
- switch to eco pellets as a source of heating at the kindergarten in Rusinovo village, Berovo municipality and use of solar energy;
- switch to gas as a source of heating at the Gianni Rodari kindergarten in Gotse Delchevand use of solar energy;

 -  IPA Cross-Border Programme

CCI Number 2007CB16IPO007

- joint development of an education programme for the children and their parents for building responsible and active attitude to the renewable energy sources and to the preservation of natural resources.

The project was successfully implemented in May 2016.
