Axis 1: Economic Development and Social Cohesion

Area of intervention

1.2 Social Cohesion

Lead Partner

7 Secondary School "Kuzman Shapkarev" - Blagoevgrad

Partner 2

Municipal Secondary School "Metodi Mitevski – Brico" - Delcevo

Duration

22 months

Total budget

267584.74 EUR

Project description

The project contributed to increasing capacity of crossborder cooperation between Bulgaria and Macedonia through educational activities: realization of extracurricular activities of the students; increasing the qualification of the teachers and educators; cultural, educational and social cohesion through activities chosen according to the interests; increasing the forms of the educational and cultural mutual action between the target groups for acquiring intelligent and productive youth; decreasing of the differential political borders. The project multiplies the effect of the Crossborder Program by adding over spatial frameworks of the impact of the two schools. Integrational behaviour is formed and motivation for cooperation between the teachers and the students on both sides of the border and all others connected through the social networks. The longterm mutual effects are connected by synergistic effects with sustainable forming cultural and economic contacts in context of the European idea for territorial cohesion. In 7SOU Kuzman Shapkarev, new halls with IT equipment were enabled for curricular and extra-curricular activities. In SOU MM Brico Delchevo, new classrooms were built and equipped with IT. The objectives and the activities of the project create good conditions for multiplication of the effect of the project in the future. The realized premises, the roof construction of the sports halls and the provided equipment for the both schools, will ensure many more opportunities for replication of the project activities upon its completion as they will affect all newly enrolled students in the future years. The good practice will provide potential for multiplication in the area in the other schools in the cross border region. The equipped schools, the reconstructed sports hall, the web page, the informative and educative materials will guarantee uploading of knowledge in the cross border region. The expected results will generate new ideas for projects and local cohesion and development.

The project was successfully implemented in May 2016.
